Academic Rigour Combined with Workshops & Real World Industry Projects

This career-focused Medicine programme in London introduces high school students to the world of medicine, combining theoretical study, clinical practice, and medical ethics while also developing English language fluency in an academic and professional context. Leave with practical insights, a portfolio of work, and valuable preparation for future medical studies and careers.

Outside the classroom, you'll develop interpersonal skills and enjoy cultural excursions across the UK, forming new friendships and broadening your global perspective.

This subject provides a foundation in medical knowledge and practice, taught by qualified doctors and senior medical students. Each system is introduced through theory, patient history-taking, and case-based learning, before moving into practical dissections, simulations, and diagnostics. Students will explore areas such as:

- Respiratory System – anatomy, case-based scenarios, pulmonary assessments, lung dissection
- Cardiovascular System – anatomy and function, ECG basics, case simulations, heart dissection
- Nervous System – neurology assessments, imaging interpretation, brain dissection
- Urinary System – renal function, diagnostic testing, kidney dissection
- Digestive System – GI anatomy and pathologies, liver dissection
- Medical Ethics & Professionalism – principles of consent, confidentiality, end-of-life care

In addition, students take part in clinical workshops such as:

- E-Simulation Suite Day – emergency A-E assessments with Sim Man
- Surgical Skills Workshop – suturing, aseptic technique, laparoscopic dexterity tasks

For more information on this programme, please follow this link to our dedicated course page: www.bucksmore.com/summer-courses/english-summer-camps/medical/

Learning Outcomes

- Develop English language skills and knowledge relating to the anatomy and function of the cardiovascular, respiratory, digestive, urinary and nervous systems
- Develop treatment plans for a range of acute and complex medical disorders
- Engage in immersive case studies and simulations that challenge you to think critically and apply multidisciplinary approaches to patient outcomes
- Practise clinical assessments, diagnostics, and dissection techniques
- Explore medical ethics, professionalism, and decision-making of clinical practice that is essential for effective patient care and collaboration in a healthcare team
- Strengthen teamwork, critical thinking, and problem-solving in simulated healthcare scenarios
- Build a portfolio of medical case studies, practical skills, and reflective learning

Accommodation & Facilities

You'll be staying in King's College London, a vibrant and bustling campus in central London. Accommodation is located in University student residence across Waterloo Bridge and amongst iconic London landmarks such as the London Eye. Flats are equipped with communal kitchens and single, ensuite rooms.

For more information on this city-centre campus, please follow this link our dedicated venue page: www.bucksmore.com/english-learning-locations/london/kings-college-london/
